

METROLINK

Material selection system

METROLINK assures that every material line connection to a processing machine can be made quickly and reliably in your production process – no contamination guaranteed.

Fixed pipe connections until the next material change ensure maximum security.

The standard version supplies up to 15 processing machines automatically with 16 material options.

METROLINK is user friendly and can be run automatically with a METROnet control or simply manually with the implemented 5.7" touch panel.

The ideal building block for your materials handling system – METROLINK.

METROLINK

Technical data

Type METROLINK	45	60
Number of material lines	4 · 16	4 · 12
Number of machines	3 · 15	3 · 15
Material lines Ø (mm)	45	60
Power supply (V/Hz)	1/N/PE 230/50	1/N/PE 230/50
Compressed air oil and water-free (bar)	6 · 10	6 · 10
Dimensions (mm)		
H1 3 - 5 material outlets	2000	2000
H2 6 - 10 material outlets	2960	2960
H3 11 - 15 material outlets	3920	3920
Weight approx. (kg) - with max. amount of equipment (H1)	240	260
Weight approx. (kg) - with max. amount of equipment (H2)	445	480
Weight approx. (kg) - with max. amount of equipment (H3)	650	700
Colour RAL (orange/grey)	2011/7040	2011/7040

Subject to technical changes.

METROLINK

Your benefits:

- Space saving – due to compact vertical design
- Wear resistant – through eliminating the need for flexible hoses
- Long life – due to rigid pipe construction
- Safe – due to secure pipe connections throughout the entire conveying cycle
- Low maintenance – because of the small number of switching operations
- Contamination free – due to automatic purging before every conveying cycle
- Quality assured – since material selection will always be correct
- Optimised capacity – there are no switching operations during normal conveying
- User friendly – easy to operate
- Easily expandable – due to modular construction
